

Scoring Criteria for Core Indicator 1(NATIONAL LEVEL): Degree of integration of climate change in national, including sector, planning

Score	Is there an approved climate change plan for the nation/sector? Note: Focus on priority sectors of the SPCR (others will be bonus)	(To what extent) Have climate resilience strategies been embedded in the central government's/sector's principal planning documents?	Has responsibility been assigned to institutions or persons to integrate climate resilience planning?	Have specific measures to address climate resilience been identified and prioritized? e.g. investments and programs.	Do all planning processes routinely screen for climate risks?
0	There is no preliminary, draft, or approved sector and national plans which incorporate climate change	Central government (line ministries) do not infuse climate change in main planning instruments; MTF does not prioritize climate change in key sectors	No responsibility has been assigned, particularly in priority sectors	There are no measures identified or prioritized for priority sectors	Processes not screened for climate change/variability risks
1-2	At least 1 sector plan and national plan being drafted/in preliminary development stage	At least 2 priority SPCR sectors within the MTF adopt adaptation measures to address climate change when setting priorities	Ministry or entity has been formally assigned coordination responsibility for climate change initiatives at the national level	Draft or preliminary climate change measures identified	Informal system being used to screen planning processes for climate change/variability risks on an ad-hoc basis
3-4	At least one sector plan <u>OR</u> at least 2 sector plans in advanced draft stage and national plan approved	At least 4 priority SPCR sectors within the MTF adopt adaptation measures to address climate change when setting priorities	CCFP Network established by ministry/entity with climate change coordination responsibility	At least 1 priority sector has identified and prioritized climate resilience measures (particularly within sector-specific Strategies and Actions Plans) <u>OR</u> drafts prepared for 2 priority sectors	Informal system being used to routinely screen planning processes for climate change/variability risks
5-6	A national sustainable development Plan being implemented; At least 2 sector plans finalised	MTF (2015-18), specifically related to 5 priority sectors, incorporates climate change OR MTF Priority targets for 5 sectors include climate change measures	CCFPs identified within 5 key sector ministries and CCFP Network functioning (Note: CCFPs have responsibility for integrating climate change in planning)	At least 2 priority sectors have identified and prioritized climate resilience measures to the stage of completion (particularly within sector-specific Strategies and Actions Plans)	Mechanisms/appropriate tools for screening climate change/risks in planning have been identified, assessed and adapted
7-8	A national sustainable development Plan being implemented; At least 3 sector plans finalized; remaining 1-2 sector plans in draft/being developed	At least 3 strategic business plans (from priority sector ministries) incorporate the climate change considerations of the MTF; the PSIP has some consideration of climate change	CCFP Network operating effectively and expanded to include at least one non-State group (civil society, academia, private sector, etc)	At least 4 priority sectors have identified and prioritized climate resilience measures to the stage of completion (particularly within sector-specific Strategies and Actions Plans)	Mechanisms/appropriate tools for screening climate change/risks in planning have been adopted and cadre of personnel have been trained in the use of relevant screening tools

9-10	A national sustainable development Plan being implemented; Climate change integrated in at least 5 key sector plans; plans being implemented	All strategic business plans, the PSIP fully incorporate climate change considerations/ measures – linked to the MTF, particularly for the priority sectors	Full operation of CCFP network to include local level stakeholders as well as non-State groups; priority sector ministries have climate change mainstreamed in planning	All priority sectors of the SPCR have identified and prioritized measures for climate resilience, to the stage of completion specifically within sector-specific Strategies and Actions Plans	Screening tools have been incorporated/rolled out in the planning processes
------	--	---	---	---	---

Notes:

- The priority sectors are the ones identified in the SPCR/Investment Projects
- The CCD is in discussion with the Cabinet Office to qualify what planning processes are to be screened for climate change/risks.
- Planning documents include MTF, country work programmes with MDBs, etc

Acronyms:

CCD – Climate Change Division

CCFP – Climate Change Focal Point

MTF – Medium Term Socio-Economic Policy Framework (under Vision 2030 Jamaica – National Development Plan)

PSIP – Public Sector Investment Programme

SPCR – Strategic Programme for Climate Resilience
